

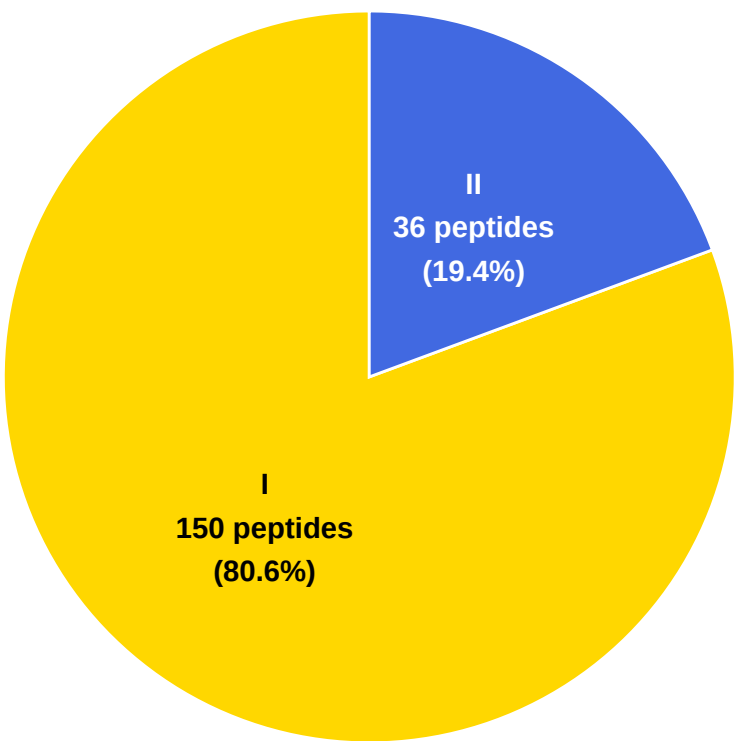

Figure 4: Neoantigen Discovery and Characterization
Class I and Class II HLA-binding neoantigens in IDH-wildtype glioblastoma

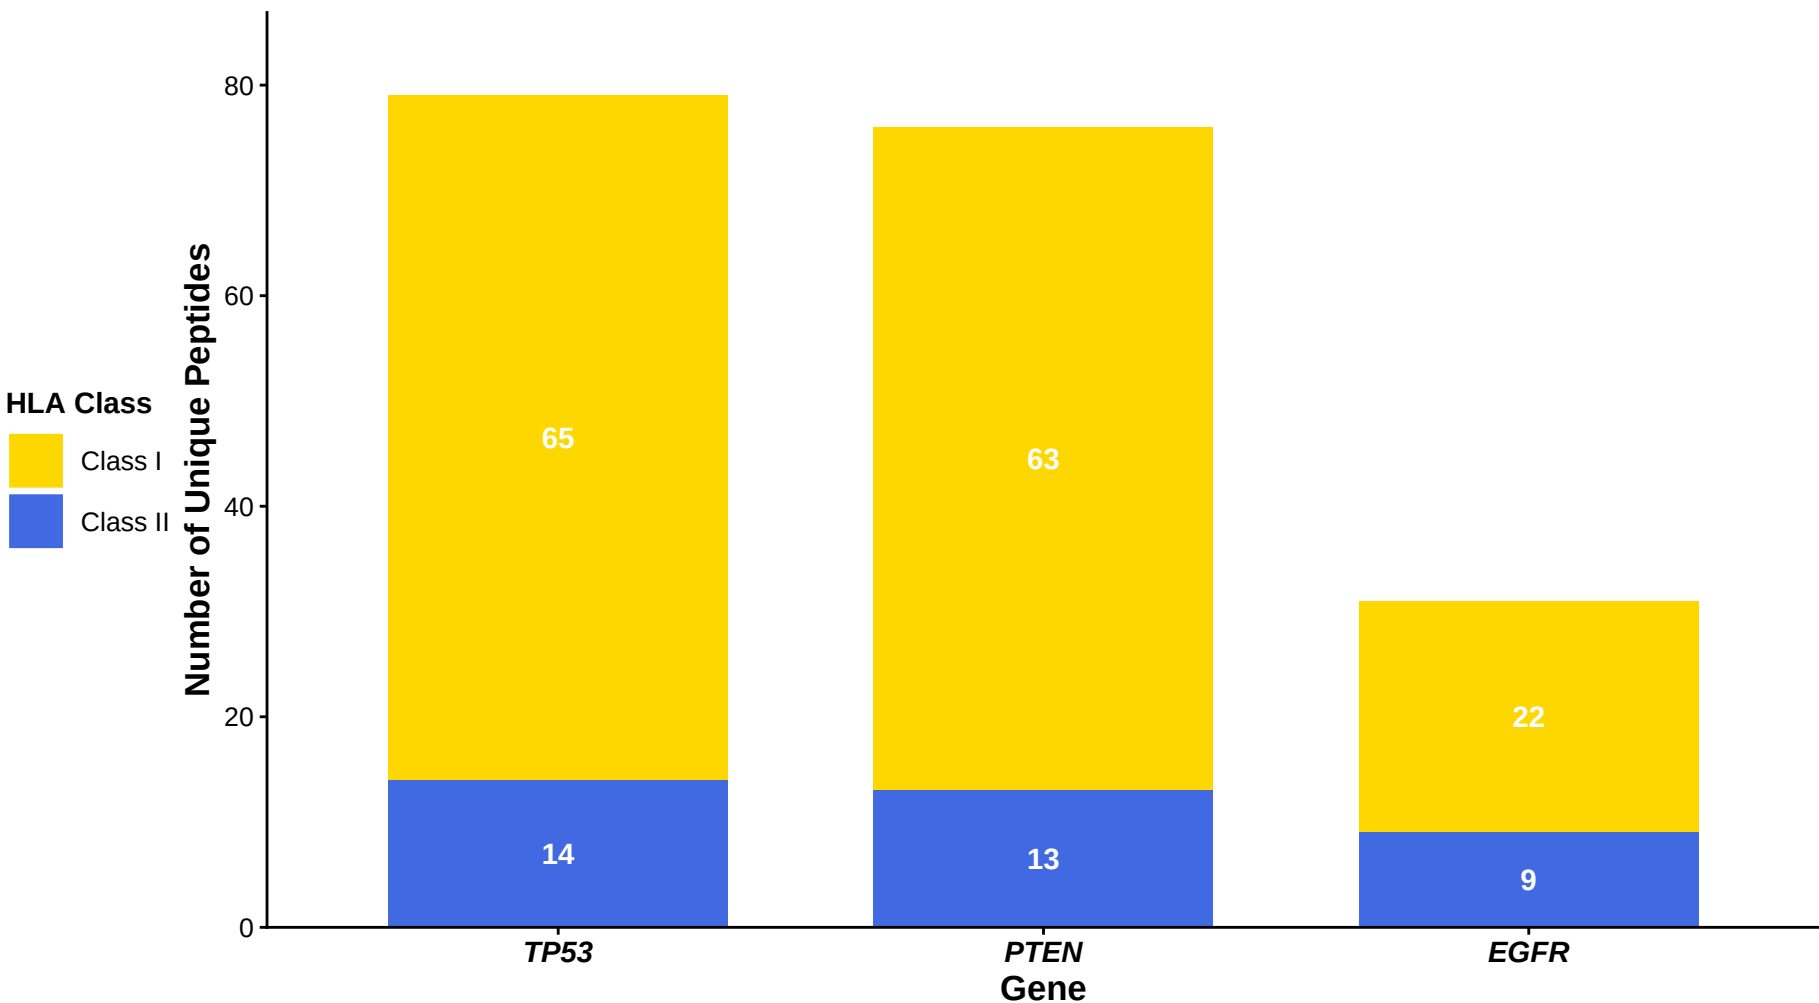

A. Neoantigen Discovery Overview

Total: 186 unique peptides | 87/127 patients (68.5%)

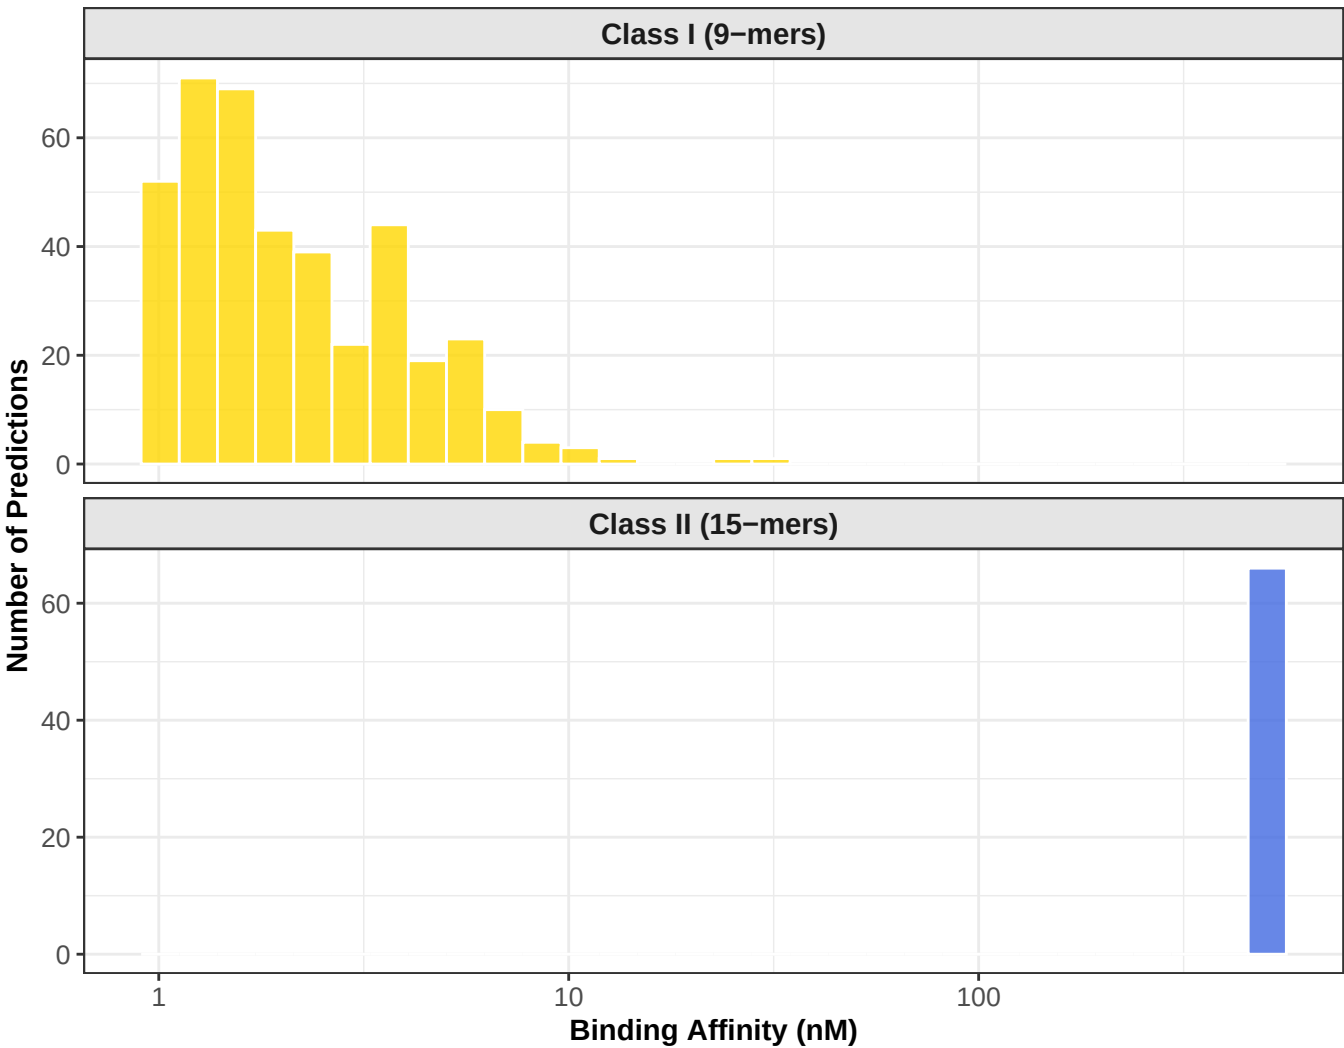

B. Neoantigens by Gene

Unique neoantigen peptides per gene

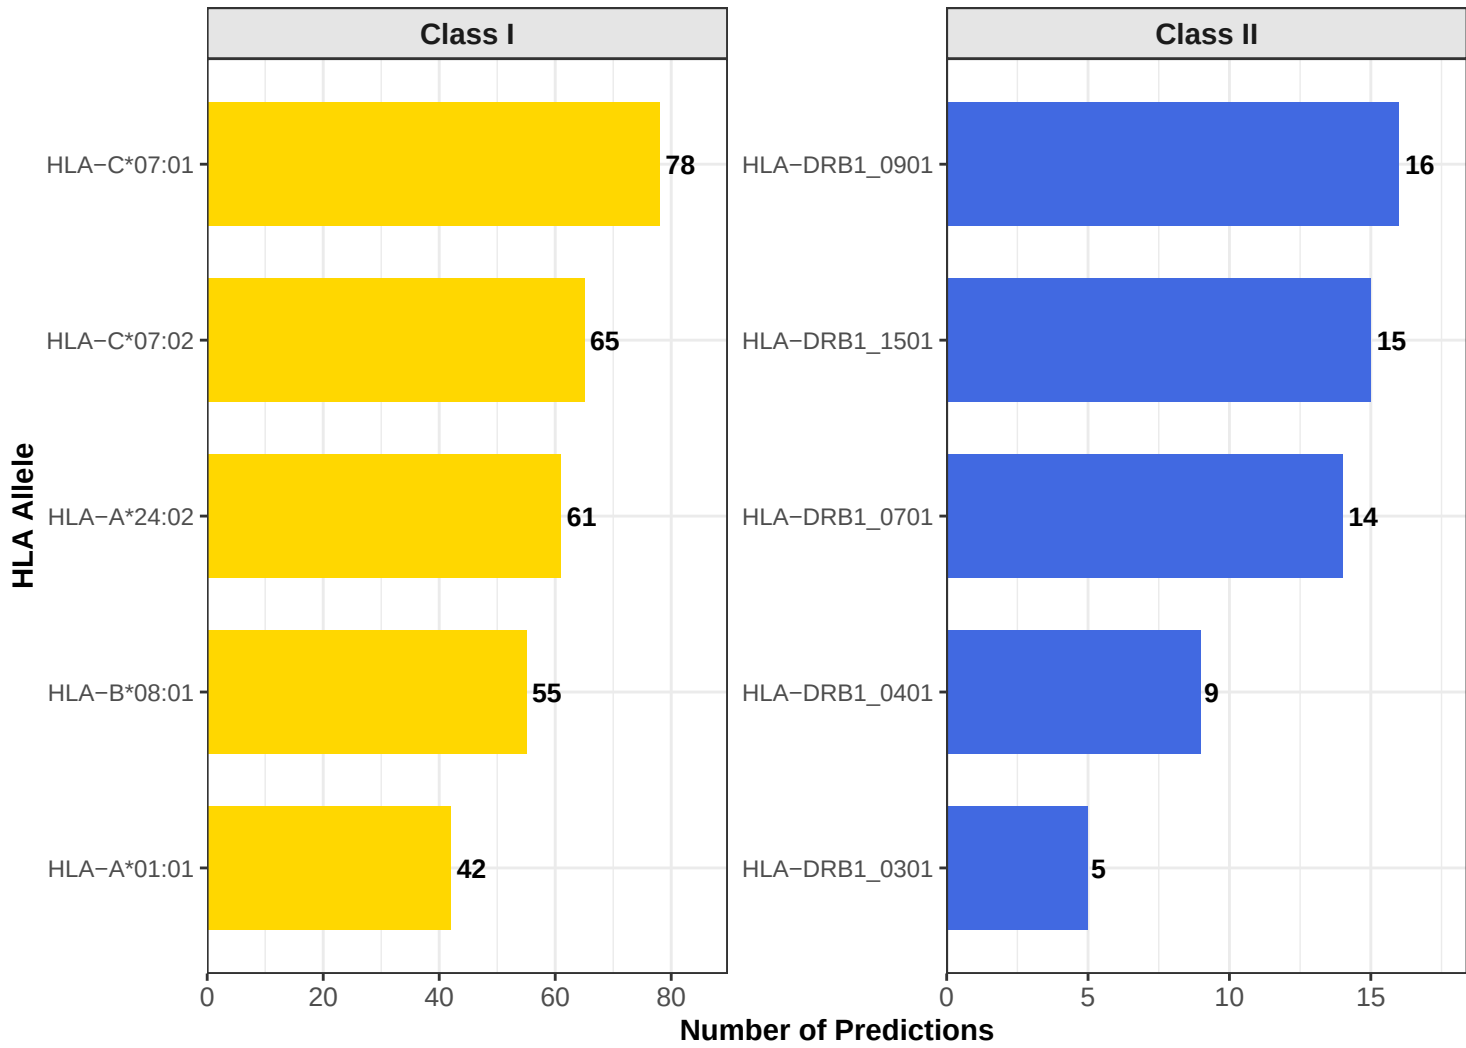

C. Binding Affinity Distribution

Strong binders (<500 nM, <2% rank)

D. Top 5 HLA Alleles per Class

HLA-peptide binding predictions

E. Patient Coverage Breakdown

Total: 127 patients
